These estimates reveal a unique state of affairs amongst the F.E. Colonial Territories. Estimated Revenue is over double the pre-war revenue, a surplus of \$1 million is estimated for the current year after meeting all special and extraordinary expenditure; and the total estimated surplus funds available at 31 December, 1947 will be \$2,826,000 (£330,000). The one reason for this happy state of affairs is the revenue from oil royalties which accounts for two-thirds of the total revenue. The dependence upon one item of revenue is of course not entirely a healthy sign, but it is difficult to suggest any increase in other sources of revenue as long as the present happy state of affairs continues.

The Governor General has approved these estimates in accordance with the arrangements agreed upon in our tel. of 11th October, 1946 (No.6 in 1946 file).

There seems to be little point in sending these Estimates to the Treasury in view of the territory's strong financial position (The Treasury do not appear to have troubled to answer our letter of 7th May on the 1946 Estimates).

Subject to any comments of Mr. Ramage as regards the items of expenditure referred to in para. 2(c), and to any comments by Mr. Boss, we can acknowledge receipt of the despatch, note that the Governor General has approved the Estimates, and agree to the action referred to in para. 4 of the despatch.

[Signature]
15th July, 1947.

I don't think any comment is called for on the items of expenditure mentioned in para 2 (c) of (2). 3
We have already expressed our concern with the educational position in Brunei, and stressed the need for early action, in (2) on 59705/46 attached. The Governor-General and the Resident have been considering Mr Fuisby's report for seven months now, so that concrete recommendations may be forthcoming soon. As Mr Palmer suggests?

MB Ramage

24.7.47

MR Bass

You will wish to comment.

I do not think the arrangements in regard to the Brunei Estimates app'd. in the at 6 on the 1946 file are in need of modification as yet.

The appreciation of the financial position over the next five years for which we asked at 14 in the 1946 file (May last) is unlikely to be forthcoming yet awhile.

I doubt the necessity of sending a copy of the Estimates to the Treasury, as they are not at the moment immediately interested, but it might be as well to keep them in touch.

G.C. Whitely

24/7

It wd. be as well
to remind.
G.C.W.
24/7

I regret delay in dealing with these papers - pressure has been rather intense!

The position, tho' nominally healthy, is not quite so good as it looks:

(a) the windfall of stamps some revenue - at least \$150,000 tho' the Crown objects sales: Brunei cannot split the market of too many issues of stamps!

(b) Cost of living allowances \$150,000 (Head 15) are included in special expenditure. They are in fact, likely to be recurrent in some measure either as C.O.C. allowances or increased salaries, for some time.

In view of the despatch at at (14) on 59701/46-7 regarding an assessment of the long term financial position, there is probably not much we can usefully add about this. I suppose we have no idea how far the oil wealth of Brunei is an immediately wasting asset? - If it is, and there is any danger of revenue from oil decreasing in the next few years, consideration should be given before too long for economic development, and it would be appropriate to spread some funds on such development. This could be considered when we receive an appreciation of the financial position.

I think Treasury could be given a copy of the Estimates for information, together

a copy of
entire, can reply to (2). If for any name,
the money from oil is less than anticipated,
or Brunei is drawn into somewhat
closer relationship with the other Borneo
colonies, it is well to keep Treasury in
the picture meantime.

para. 4 of (2). seems reasonable in view of
the many possible outstanding commitments:
no doubt it is always possible to draw
upon the Reserve Fund - or has it some
special sanctity? - but if other additional
commitments do arise, some additional
income will be required.

W. J. Bon
2/8

Mr. Mayle

? as at X of my minute

Mr. Boss

Sir G. Whiteley

This five years appreciation from Brunei is interesting. Apart from any expenditure on war damage compensation and on restoration/Government property (£1,500,000) it is estimated that over the years 1948 to 1952 there will be a net surplus of \$9 million, being \$9,650,000 surplus of oil revenue over special expenditure offset by a net deficit of about \$650,000 in respect of other revenue and expenditure. The Government will, however, start off 1948 with a Revenue Surplus of about \$900,000 plus Reserves of about \$2,750,000 (see pencil figures on the front of the printed Estimates enclosed in No.2). In view of the former revenue surplus of \$900,000 which will more than meet the estimated accumulated deficits over the five years of normal revenue and expenditure (\$613,000), it is not clear why, as suggested by the Treasurer in paragraph 8, any part of the oil revenue should be earmarked to meet the accumulated

/of

deficits.

8

deficits. On the other hand, as long as Brunei continues this somewhat curious system of a double budget ((i) oil revenue to meet special expenditure and balance placed to reserve; and (ii) other revenue and recurrent expenditure) then some percentage of the oil revenue might well be considered as available for general development and social services such as education (at present Brunei spends more on Police and Prisons than on Education) and the percentages suggested by the Treasurer (10% in 1948 and 1949, and 5% in 1950, 1951 and 1952) do not appear to be unduly high.

The above figures take no account of (a) any contribution towards the cost of the military administration - a liability we hope will never mature, but Treasury for their part are not at present prepared to waive their claim to a contribution - (b) any expenditure on war damage compensation - an unknown factor at present but the Treasurer suggests that Brunei might be asked to contribute \$4½ million towards the cost of any scheme; and (c) \$1½ million cost of restoration of Government property.

As in the case of all these Far Eastern Colonial territories, (a) and (b) above are the unknown factors which make it impossible to give any firm appreciation of the financial position over the next five years.

Subject to the point above as to the Revenue Reserve at the 1st January, 1948 being sufficient to meet "normal" deficits over the next five years, we can approve paragraph 2 of the Governor-General's savingram.

A. Lawrence

22.1.48.

I think that the Treasurer's reasoning leads up to a false conclusion at (3) in para 2 of this report. His reasoning as regards revenue appears sound & I have no reason not to accept his figures, but I think he goes astray on expenditure. He assumes that ^{ordinary} expenditure will reach its zenith in 1952, in which year, for the first time, it will be exceeded by non-oil revenue. But he tells us in para (5) that his expenditure figures have been averaged out - this means that the zenith figure must be \$1,450,000+

- what

+ A possible calculation
is as follows:

Exp. 1947: \$1,000,000

Exp. 1949-52: \$7,250,000,
which, might be built
up steadily from \$1 m.
in 1947 as follows:

1948: \$1,150,000

1949: \$1,300,000

1950: \$1,450,000

1951: \$1,600,000

1952: \$1,750,000

Total: \$7,250,000

Average: \$1,450,000.

Obviously everything
depends on the nature
of the program, but
the above is a not
unhealthy one - & it
leaves revenue a
long way behind
in the race.

what the amount of the ^{plus} is we do not know.⁺

But I think it is clear that in fact, ^{non-oil} revenue
will not overhaul ordinary expenditure until a
date subsequent to 1952. I therefore agree
that oil revenue will have to be brought in
in order to help out.

I do not, however, see any virtue
in ear-marking any particular percentage
of oil revenue for this purpose. It is a
convenient and maybe salutary fiction to
make out that oil revenue is only available
to meet extraordinary expenditure - but it
should be ~~is~~ nothing more than a fiction. Oil revenue
should be counted in with general revenue &
the aim should be to place as much revenue
as possible to reserve because one day oil as
a source of revenue will no longer exist.

This brings me to the third para of
the memorandum: I am all in favor of
building up as big a reserve as possible,
but I dissent emphatically from the view to
which the Governor General appears to consider
it ~~to~~ should be put - i.e. to act as a
reservoir upon which to draw to meet the annual
deficit when oil revenues are no longer
available - for this, presumably, is what is
meant by "when oil revenue diminishes or
ceases, the State's reserves enable it to maintain
the standards which it should then have
attained." The reservoir could be
utilized in two ways:

1. By running down capital - but eventually
all the reserves will have been spent

and

2) By inserting the capital and using the interest to balance the budget.

This can be criticised on two broad grounds:

a) It appears to be a fact that the rentier - in the long run, for where a Govt. is concerned this can only be looked at in the long run) - always loses since the long-term pressure is for ~~the real value of the money earned to decline~~ the real value of the money earned to decline. And a Govt., unlike an individual, cannot seek to maintain its real income by speculating.

b) Morally, it seems to be a counsel of defeat to suggest that a Government should live on ~~the~~ ~~interest~~ its investments, implying as it does a woeful lack of

^{enterprise}
It is highly important that reserves should be accumulated during good times, but when the time comes to draw upon them they ~~Colony's reserves~~ should rather be ^{the Colony's} employed to develop ~~the~~ economic resources and to increase its productive capacity in every possible way so that, when the last oil well runs dry, there are other industries and occupations available to take over the burden of maintaining and improving the standard of living to which the community has by then advanced.

I should therefore be inclined

to

to reply to (9) broadly upon the above
lines, subsequently (if the Dept. consider this
to be necessary) sending a copy of (9) & its
enclosure to the Treasury, informing them
of the action we have taken.

Mr. Bors has seen this minute
and broadly agrees with it.

CATHAY BUILDING (9TH FLOOR),

Ref (8) in G.G.100/47.

Singapore, 6th April, 1948.

(11) on 59701/47

The Secretary-General presents his
compliments to the Under Secretary of State
for the Colonies and, with reference to
paragraph 3 of the Governor-General's secret
Despatch No. 1 dated the 30th January, 1947,
has the honour to forward three copies of the
Brunei Financial Statements for the Fourth
quarter, 1947, together with three copies of

a Memorandum by the Treasurer, Brunei.

The Under Secretary of State for the Colonies
COLONIAL OFFICE.

c.c. The British Resident,
BRUNEI.

Treasury,
Brunei,

29th March, 1948.

The British Resident,
Brunei.

With reference to the State's financial position and prospects, I enclose herewith the following statements for the fourth quarter of 1947

- (A) Surplus and Deficit Account.
- (B) Assets and Liabilities.
- (C) Account of Cash Receipts and Payments.

2. Revenue. Customs Revenue is exceptionally high this Quarter. This is partly due to the response by the British Malayan Petroleum Co. to pay all duties outstanding before the close of the year and partly due to the arrival of a very large amount of dutiable equipment.

An unestimated item of \$419,000 was received from the Malayan Currency Board in respect of currency profits. Oil Royalties amounted to \$761,000

3. Expenditure. Expenditure on behalf of Medical Services - Public Works was considerably less than anticipated owing to the non-arrival of materials.

4. Prospects remain sound.

O. Lunn

D. R. SERPELL, Esq.,
TREASURY

Dear Serpell,

~~You may remember~~
~~Please refer to my letter~~

(7) of 13th November 1947, in which I mentioned that the matter of the five-year estimate of BUNEI finances was still in hand.

The Governor-General, Malaya has now sent us a Memorandum by the Treasurer of Bunei, a copy of which I enclose for your info, together with a copy of our reply.

FURTHER ACTION.

Copy of (9)
Copy of draft
below

SAVING.

From the Secretary of State for the Colonies.

To the ~~Officer Administering the Government of~~ *Alfred A. Mearns* SINGAPORE.

Date *11 MAR 1948*

No. *251 55* Saving. Confidential.

Your saving No.130.

Brunei Finances.

I have the following comments on the memorandum prepared by the Treasurer of Brunei.

2. It appears that the Government of Brunei will begin 1948 with a Revenue Surplus and Reserve Funds, composed as follows :-

	<u>Revenue Surplus</u>	<u>Reserve Fund</u>
At 1.1.47	£833,324 (estimated)	£1,898,882
1947 Estimated Surplus of £927,154 broken down:-	<u>76,649</u>	<u>850,505</u>
At 31.12.47 (Estimated)	<u>£ 909,973</u>	<u>£2,749,387</u>

The revenue surplus alone would, it appears more than cover the accumulated deficits of non-oil revenue against ordinary expenditure, 1948-52, estimated at £613,000.

3. The use of an average annual figure of Personal Emoluments and Other Charges Annually Recurrent in Appendix A of the Memorandum gives a misleading impression of the relation of Personal Emoluments and Other Charges Annually Recurrent to Non-Oil Revenue. If, as is stated in paragraph 5, the zeniths of Personal Emoluments and Other Charges Annually Recurrent will be reached in about 1952, an estimate properly based on that opinion would presumably show a deficit and not a surplus in 1952. I suggest that the figures for the individual years should be something like this :-

	<u>Personal Emoluments and Other Charges Annually Recurrent.</u>	<u>Deficit (-) or Surplus (+)</u>
1948	£1,150,000	+ 37,000
1949	£1,300,000	- 46,000
1950	£1,450,000	- 114,000
1951	£1,600,000	- 197,000
1952	£1,750,000	- 293,000
Total	<u>£7,250,000</u>	<u>- 613,000</u>

Average p.a. £1,450,000

4. The conclusion reached at the beginning of paragraph 8 of the memorandum seems to be open to question, but I agree with the proposition that oil revenue will have to be brought in to make good the deficit, except in so far as that deficit is not met from the Revenue Surplus referred to in paragraph 2 of this savingram. This, however, raises the whole issue of continuing to maintain

two separate budgets. I am not aware of the origin of this system and it is not clear what purpose is served in earmarking any particular percentage of oil revenue for the purpose of meeting a deficit on the non-oil budget. In the past it may have been a convenient and salutary fiction to lay down that oil revenue was only available to meet extraordinary expenditure but it should be nothing more than a convenient rule of thumb working arrangement, and I incline to the view that oil revenue should in future be included in the general revenue, and that the aim should be to put a reasonable proportion of the total revenue to reserve against the time when oil as a source of revenue will no longer exist.

5. In this connection, however, I do not feel able to agree with the implication in paragraph 3 of your Saving No.130, that, when oil revenue diminishes or ceases, the standards to which the State should then have attained ought to be maintained by merely drawing on the accumulated reserve funds, as if the loss of oil revenue is offset by drawing on reserve funds, those funds will eventually be exhausted and the State will be left without reserves or alternative sources of revenue.

6. In my view it is important that whilst reserves should be accumulated during good times from the oil revenue, they should be utilised to develop the other economic resources of the State and to increase its productivity in every possible way. A positive policy of this kind offers the best assurance that, when the last oil-well runs dry there shall be other industries ready and able to maintain and improve the standards of living to which the community will by then have advanced.

DRAFT. SAVINGNo. 55
251.....Confidential

11 MAR 1948

February, 1948.

ACTING GOVERNOR-GENERAL of Malaya
at SINGAPORE.

Your saving No. 130.

Brunei Finances.

I have the following comments on the memorandum prepared by the Treasurer of Brunei.

2. It appears that the Government of Brunei will begin 1948 with a Revenue Surplus and Reserve Funds, composed as follows:-

	<u>Revenue Surplus</u>	<u>Reserve Fund</u>
At 1.1.47	£833,324	£1,898,882
	(estimated)	
1947 Estimated Surplus of £927,154 broken down:-	76,649	850,505
At 31.12.47 (Estimated)	£909,973	£2,749,387

The revenue surplus alone would, it appears more than cover the accumulated deficits of non-oil revenue against ordinary expenditure, 1948-52, estimated at £613,000.

3. use of an The average annual figure of P.E. and ^{annual} ~~annual~~

O.C.A.R., used in Appendix A of the Memorandum, appears to give a ~~false~~ ^{misleading} impression of the relation of P.E. and

O.C.A.R.

FURTHER ACTION.

Copy to Treasury
(see draft letter)

Can charges
be made
annually

O.C.A.R. to Non-Oil Revenue. If, as is stated (Min. of 2/2)

in paragraph 5, the zeniths of P.E. and O.C.A.R.

will be reached in about 1952, an estimate

properly based on that opinion would almost ^{presumably}

~~now a deficit and not a~~
~~certainly exclude the possibility of any non-~~

~~oil revenue surplus in 1952. A suggested~~

~~that the figures should~~
~~calculation, as follows, results in non-oil~~

~~be something like this:~~
~~revenue being less than expenditure in every~~

~~year after 1948:~~

In the individual years

	<u>P.E. & O.C.A.R.</u>	<u>Deficit (-)</u> <u>or</u> <u>Surplus (+)</u>
1948	\$1,150,000 ⊕ →	37,000
1949	\$1,300,000	46,000
1950	\$1,450,000 -	114,000
1951	\$1,600,000 -	197,000
1952	\$1,750,000 -	293,000
Total	\$7,250,000 ⊖ →	613,000

Average p.a. \$1,450,000.

4. Accordingly ~~The~~ conclusion reached at the beginning of paragraph 8 of the memorandum ~~would~~ *seem to be then to question, which* ~~appear to be false~~, but I agree with the proposition that oil revenue will have to be brought in to make good the deficit, except in so far as that deficit is not met from the Revenue Surplus referred to in paragraph 2 of this savingram. This, however, raises the whole issue of continuing to maintain two separate budgets. I am not aware of the origin of this system and it is not clear what purpose is served in earmarking any particular percentage of oil revenue for the purpose of meeting a deficit on the non-oil budget. In the past it may have been a convenient and ~~may be~~ salutary fiction to lay

down

down that oil revenue was only available to meet extraordinary expenditure but it should be nothing more than a convenient rule of thumb working arrangement, and I incline to the view that oil revenue should in future be included in the general revenue, and that the aim should be to put to reserve a reasonable proportion of the total revenue ^{against} because ~~the time when~~ ~~one day~~ oil as a source of revenue will no longer exist.

5. In this connection, however, I do not feel able to agree with the implication in paragraph 3 of your Saving No. 130, that, when oil revenue diminishes or ceases, the standards to which the State should then have attained ought to be maintained by merely drawing on the accumulated reserve funds, ^{as} ~~firstly~~, if the loss of oil revenue is offset by drawing on reserve funds, those funds will eventually be exhausted and the State will be left without reserves or alternative sources of revenue.

6. In my view it is important that whilst reserves should be accumulated during good times from the oil revenue, they should be utilised to develop the other economic resources of the State and to increase its productivity in every possible way. A positive policy of this kind offers the best assurance that, when the last oil-well runs dry there shall be other industries ready and able to maintain and improve the standards

of living to which the community will
by then have advanced.

SECEP.

S A V I N G

From: GOVERNOR-GENERAL, MALAYA.
To: SECRETARY OF STATE FOR THE COLONIES, LONDON.
Date: 17th December, 1947.
No: 130 Saving.

CONFIDENTIAL

(14) on 59701/47
Your Despatch Malaya No.31 Confidential of
6th May, 1947. BRUNEI FINANCES.

I enclose herewith copy of a Memorandum prepared by the Treasurer of Brunei to which is attached as Appendix A the forecast requested in your Despatch under reference.

2. I would suggest that the State's pre-war financial policy should be modified over the next four years to enable oil revenue to be used to the extent recommended in para 8 of the Treasurer's Memorandum in order to cover the expected deficit under Personal Emoluments and Other Charges Annually Recurrent as shown in Appendix A to the Memo.

3. I am strongly of opinion that a fairly large proportion of the State's surpluses should be placed to General Reserve. Oil must, it would seem, be regarded as a wasting asset, and since for some years to come oil revenue is likely to represent about 75% of the State's total revenues it would be prudent to ensure that, when oil revenue diminishes or ceases, the State's reserves enable it to maintain the standards to which it should then have attained.

GOVGEN

B.R.

With reference to your request for my views and figures for a five-years financial forecast in respect of this State, I have set-forth herebelow as briefly as possible the various factors which I have taken into account in making the forecast.

2. The forecast itself in terms of figures appears as Appendix 'A'.

3. Based on the known factors I think I have given a fair forecast of the Revenue and Expenditure spread over the next five years.

FACTORS:-

(1) OIL. World supply is decreasing. Demand remains unless a new type of energy can be used (e.g. atomic). It is assumed oil will be source of energy for next five years. Therefore price of oil should not fall. Therefore States' Oil Revenue cannot fall, provided geological forecast of fields is correct.

Present output about 6000 tons per day. Target may reach 8000/10,000 sometime. I have taken 7000 tons per day to produce average revenue \$4,000,000 per annum.

Constructional Period of new refinery and road will be 1948, 1949. After this period import of machinery and equipment should drop considerably. Duty on machinery is to be removed. Therefore potential loss of duty will be most marked in 1948, 1949.

(2) REVENUE. New Tariff will not in itself produce more revenue (in my opinion), it will merely preserve the balance between increased rates of duty and the removal of items from the tariff or decreased rates of duty on various items. It should however in the long run contribute to the prosperity of the country by aiding and accelerating rehabilitation and thereby increase the spending power and ability to import more goods which in turn will produce more Revenue. Therefore we see a slow but definite increase in the general NON oil revenue.

(3) EXPANSION. Excluding oil, the main directions in which expansion should take place among Revenue producing activities are: Municipal, Customs and Excise, Posts and Telegraphs. The Municipal revenue will increase as the new towns are gradually erected and the Posts and Telegraphs will follow the same trend plus an extra fillip from the Oil Company's expansion. But in neither case can the increase amount to a great deal, probably some \$50,000 per annum.

Customs and Excise is explained above.

Development in other directions such as Education, Agriculture, Health, Police etc will produce no revenue.

It is desirable that more roads be constructed to assist in developing the Forestry Department's schemes but it is doubtful whether the Public Works Department will be able to attempt or complete the scheme within this five years. Another problematic development is the erection of wharves and provision of harbour facilities in conjunction with the Oil Company's projected refinery at Muara Island. If the Company is permitted to have its own private wharves, a fee may be charged. In addition to this fee wharf and general harbour dues would be collected, if the State erected a wharf for public use. It is impossible at this juncture to make a sound estimate but it is quite obvious

/that

that if the State has to build a wharf that a profit will not be shown for considerably longer than five years.

The Electrical Department should produce some revenue when the new plant is installed, but this may not be until 1950, at the moment it is run at a considerable loss.

(4) EXPENDITURE

PERSONAL EMOLUMENTS AND O.C.A.R.

(a) Staff must increase to keep pace with the State's development and rehabilitation. The Oil Company's projected schemes for trunk road, refinery, wharves etc. is on a grandiose scale.

(b) Salaries. It is logical to assume that new Salaries Commission will ensure a general up-grading of all salaries. I consider it is unlikely that H.C.L.A. will fall for a couple of years and then only gradually.

(c) O.C.A.R., excluding H.C.L.A. mentioned in (b), will have to increase as a result of expansion in staff, buildings, electrical plant etc.

Personal Emoluments should have a sudden increase due to general increase in salaries and then gradually increase further with expansion until the zenith is reached after which it should remain fairly static.

O.C.A.R. should increase more rapidly each year in proportion to the amount of rehabilitation and expansion accomplished until it reaches a zenith then should be fairly static.

(5) I consider the zeniths referred to in paragraph (4) will be reached in about 1952, I have therefore set down an average expenditure annually to cover the intervening five years. This is under P.E. \$700,000 and under O.C.A.R. \$750,000.

(6) O.C. SPECIAL EXPENDITURE (excluding P.W.Extraordinary). This item was in general under estimated for 1947 partly owing to lack of data on which to base current prices. It will immediately increase for that reason and also because so much material is required for rehabilitation. As material arrives, so the need will decrease. Prices should fall in time but I do not think this will be noticeable until 1950. I have shown a decreasing expenditure each year to cover these factors.

(7) P.W.EXTRAORDINARY. The P.W.D. is limited in its activities by labour, materials and technical staff. The State Engineer considers he will be fully occupied in re-building the destroyed towns over the next five years without branching out into other desirable schemes. In my opinion the Staff difficulties should and will be partly overcome but perhaps not until 1949 or 1950. I consider that prices will fall slightly in late 1949 and 1950. I have allowed for these factors, fall in prices and ability to cope with more work. As the towns are completed, so will more energy be available for other tasks and less proportionally will be required to be done. The expenditure curve therefore falls in the later years.

(8) The foregoing factors when reduced to figures (see Appendix A) disclose a deficit in respect of non-oil revenue on a decreasing scale until 1952 after which I consider we can pay our way as regards P.E. and O.C.A.R. from non-oil revenue.

/It

It will be necessary and wise to amend the present fiscal policy to enable the State to meet this deficit and keep pace with its obligations to the Public and expansion and Prosperity of the State. I recommend that the State be permitted to earmark part of the Oil Royalties for this purpose on a sliding scale of approximately the following ratio:

1948	10%	400,000
1949	10%	400,000
1950	5%	200,000
1951	5%	200,000
1952	5%	200,000

This would amount to some \$1,300,000 only which is about twice as much as the estimated deficit and should leave a margin for safety.

(9) The oil-revenue surplus over the expenditure on account of Special and Extraordinary Expenditure shows a slow and steady increase from \$1,600,000 to \$2,400,000.

(10) A summary of the Revenue and Expenditure over the five years 1948/1952 shows a net surplus of \$9,000,000. It is this figure no doubt which is to be taken into account when War Claims are considered. This surplus has allowed nothing for (a) Reserve (b) A probable \$ $\frac{1}{2}$ million for building wharves at Muara.

I can only express as a personal opinion that the State should offer, if called upon to do so, a contribution of half its net surplus over this period which may amount to about 10% of the War Damage Claims (excluding Government).*

\$2,700,000
Sd. D. TRUMBLE

STATE TREASURER,
BRUNEI.

Brunei,
1st September, 1947.

* A very rough estimate of the Brunei War Damage Claims gives a round figure of \$37,000,000/-. This may eventually be reduced by:- (a) an overall percentage reduction of claims (b) a contribution from United Kingdom funds.

The above figure is exclusive of the war damage to Government installations which is estimated at about \$1,500,000.

S. Trumble
(Sgd) D. TRUMBLE.
TREASURER.
BRUNEI

Reference No.(5) in B.T. 15/1947.

The British Resident,
Brunei.

With reference to the State's financial position and prospects, I enclose herewith the following statements for the third Quarter of 1947:

- (a) Surplus and Deficit Account.
- (b) Assets and Liabilities.
- (c) Account of Cash Receipts and Payments.

2. Revenue. Customs Revenue is unexpectedly higher this Quarter than last. The increase of \$250,000 is due to large imports by the British Malayan Petroleum Coy. in connection with its oilfield development project.

3. Expenditure. Expenditure has been normal with the exception of that under P.W.D. which is lower than expected owing to non-arrival of goods.

4. Oil royalties accruing during this period amounted to \$761,000 and will be shown in the last Quarter's Return.

5. Prospects remain sound.

Brunei Treasury,
Brunei, 12th Nov., 1947.

36

Dear Serpell,

Thank you for your letter of the 29th October about the Brunei Estimates for 1947. As regards rehabilitation stores, provision is made for the supplies ordered by Brett, under Head 24, IV, item 31. The other supplies were in general for sale to the public, and are, therefore, presumably dealt with in separate accounts not appearing in the Estimates.

2. As regards the 5 year estimate on which a review of the State's financial policy may be based, you will see that we reminded the Governor-General on this point on 5th September in our Brunei despatch No.4, a copy of which was enclosed in my letter to you of the 6th September, 59710/47.

Yours sincerely,

(G.Whiteley.)

GREAT GEORGE STREET,

LONDON, S.W.1.

29th October, 1947

Dear Whiteley,

(4) Please refer to your letter of 6th September forwarding the Brunei Estimates for 1947. We note that the State is budgetting for a large surplus on the year's working, although, as the British Resident indicates, this may well be mopped up by unpredictable calls during the course of the year.

It would seem that in addition to the liabilities mentioned by the British Resident, there will also be the State's liability in respect of stores and supplies received for rehabilitation purposes. We asked last

Sir G. Whiteley,
Colonial Office

/year

year what provision, if any, was being made for this. Perhaps you would now let me have a reply to this point, which still applies.

(15) 59701/7 I take it that the review contemplated in Mayle's letter of the 7th May is being pursued? Has the 5 year estimate which you asked the British Resident to prepare yet been received?

Yours sincerely,

Dr. L. S. S. S.

COPY

Ref: No.(4) in B.T. 15/1947.

The British Resident,
Brunei.

With reference to the State's financial position and prospects, I enclose herewith the following statements for the second Quarter of 1947:

- (a) Surplus and Deficit Account.
- (b) ~~Assets~~ and Liabilities.
- (c) Account of Cash Receipts and Payments.

2. Revenue. The two main items paid into revenue were both received from the British Malayan Petroleum Co. and were in respect of Customs duties (\$200,000) and Oil Royalties (\$233,000). This latter figure is disappointing as it was estimated that production would be larger in the first Quarter than it has been. This payment represents the royalties payable for the half-year ending 28 February 1947 and therefore includes the lower production months of 1946. Production has stepped up considerably during this Quarter and should continue to do so. It follows therefore that higher revenue producing months will be at the end of this year but payment therefore will not be received until 1948. The next and last payment for this year will be made in September. The Oil Royalty actually received may therefore prove to be considerably less than shown in this year's Estimates in spite of increased production. This will be accentuated by the fact that the new arrangement by which Royalty will be paid in kind did not come into effect until 12 August. This arrangement almost doubles the rate of royalty but has become effective later than expected and will be reflected for only six weeks of the revenue received this year i.e. up to 30 September.

3. Revenue in general has exceeded expectations but this excess will probably be off-set by the recent legislation which exempts from import duty machinery and plant imported as replacements for similar materials destroyed or damaged during the war.

4. Expenditure. There is nothing of exceptional interest under this head. The main item is \$118,000 on account of P.W.Dept. This represents part of the erection programme. In general expenditure is going according to plan but it is not yet certain that materials will arrive in time to complete all the Public Works for which Estimates were made.

5. There has been a large payment "below the line" amounting to some \$308,000 in respect of the repayment of cash taken over from the B.M.A.

6. The prospects are sound. I am still of the opinion that after taking into consideration all the factors the State's budget will balance at the close of the year.

NO. 6

See (2)

17 June, 1947.

Sir,

I have the honour to transmit herewith twelve copies of the Brunei Estimates of Revenue and Expenditure for the year 1947, together with six copies of a statement by the State Treasurer, Brunei.

2. The British Resident has the following comments to make:-

"(a) As regards Revenue, it appears from the British Malayan Petroleum Company's enormously increased programme of production that the revenue from oil royalties is likely to form at least two-thirds of the total revenue of the State and that as a result the revenue this year should be at least double that of the best year before the war. This will bring in its train a considerable number of problems but the first and foremost problem is the stepping-up of public and social services to keep pace with the increased wealth and needs of the country. The principal difficulty in this respect is the recruitment of adequately qualified staff which in its turn depends upon (1) the institution of adequate salary schemes to attract people with the requisite qualifications and (2) the improvement of education to enable the people of the country to fit themselves for the increased responsibilities which will have to be shouldered.

(b) As regards expenditure generally it has only been possible to make very rough approximations in respect of the cost of items of Special Expenditure and Public Works Extraordinary owing to -

(i) the lack of knowledge in Brunei as to exactly what equipment is to be expected under the Brett Report and Young Report. No copy of the Brett Report has ever been received here;

(ii) ignorance of the cost of items coming forward under the Reports mentioned in (i) above including freight, marine insurance, etc;

(iii) the complete lack of price catalogues at present.

In view of the above it is quite possible that as the year progresses it will be necessary to apply for supplementary warrants although I have allowed a reasonably generous margin taking into account the existing enhanced prices and labour

/costs.

The Right Honourable
A. Creech Jones, P.C., M.P.,
COLONIAL OFFICE.

costs. There is also the present uncertainty as to what materials will be available in 1947 and it is possible that many of the votes will not be expended if the materials are not forthcoming.

(c) As regards various specific heads of expenditure I submit explanations in respect of -

(i) H.H. the Sultan. The increase over the 1941 Estimates is in anticipation of approval of the recommendations made previously.

(ii) Ministers. This includes the appointment of Pengiran Bendahara which has been vacant since the death of the previous holder in 1943. It is intended that a new appointment should be made this year. The vote also allows for an increase in the personal allowance of Pengiran Pemanha recommended previously.

(iii) Agriculture. The item of \$24,500 for the wet padi settlement scheme was provided at the time when there was a considerable amount of Displaced Javanese labour available and there was no indication as to when these people would be repatriated. As it happened they were all evacuated at short notice. In view however of the serious rice shortage in this part of the world which appears likely to continue for at least another year I consider it essential that Government should take steps to encourage the production of rice as much as possible. In the circumstances now existing however it is unlikely that the whole of this sum will be spent.

(iv) Education. This includes provision for absolutely essential improvements in the facilities and organisation of this Department if it is to meet the expanding needs and aspirations of the people of the country. Many of the recommendations contained in the Frisby Report, which is still under consideration, have been provided for including a sum of \$10,000 as a first instalment towards the institution of a combined establishment at Seria as recommended by Mr. Frisby. This scheme is, however, dependent upon the active co-operation of the British Malayan Petroleum Company. In this connection I should mention that the General Manager of the Company is most anxious to co-operate and has submitted his recommendations to the Head Office in London from which a decision is awaited.

(v) Land. The Special Expenditure of \$148,450 under this Head is mainly in respect of the acquisition of land for - (1) The construction of a new hospital in Brunei Town to replace the one destroyed during the war. The old site was not very suitable as both the Medical Officer and State Engineer

/considered

considered it too low-lying, too exposed and too noisy, and moreover it is now required for other purposes in order to allow room for expansion under a new Town Planning scheme which has had to be prepared as the result of the total destruction of Brunei Town during the war.

(2) The construction of a Trunk Road through the State by the British Malayan Petroleum Company.

(vi) Public Works Extraordinary. There is an enormous amount of rebuilding and rehabilitation work to be done as the result of destruction and neglect during the war. The two main limiting factors to progress in this Department at present are (a) shortage of qualified personnel, (b) shortage of materials.

(vii) Political Pensions (Appendix D). I have entered two columns, the first showing the pensions payable at present and the second those which I have recommended with effect from 1947."

As regards sub-paragraphs c(i), c(ii) and c(vii) of these comments, I have approved the recommendations made by the British Resident for the increases in Personal Emoluments shown under the Head of Expenditure - H.H. THE SULTAN, the increase from \$250 per mensem to \$400 per mensem of the Personal Allowance to Pengiran Pemancha shown under Item 4 Head 3 MINISTERS Personal Emoluments, and the increases in the Political Pensions, Item 1 Head 1, PENSIONS, RETIRED ALLOWANCES GRATUITIES, ETC., which are detailed in Appendix D.

(1) on 59705/46. The Frisby Report referred to in sub-paragraph c(iv) of the comments was forwarded to you under cover of my telegram No. 28 Saving dated the 18th November, 1946.

3. The British Resident also states that he is unable at present to propose any contribution in 1947 to the General Reserve Fund in spite of the estimated surplus as it would appear that there may be considerable further financial commitments which cannot at present be assessed.

4. In approving the Estimates, I decided that the British Resident had acted wisely in not making any further allocation to the Reserve Fund at the moment in view of possible heavy commitments on the items detailed in the second paragraph of the Treasurer's statement and because of the possibility of the revenue being less than that estimated if the British Malayan Petroleum Company fails to produce as much oil as it expects.

I have the honour to be,
Sir,
Your most obedient, humble servant,

Malcolm MacDonald

GOVERNOR-GENERAL.

A total surplus of \$927,154 is shown in these Estimates. This is chiefly accounted for by Oil Royalties which amount to \$2,000,000. Of this total there is (a) A surplus of \$75,649 from revenue from sources other than oil over expenditure on account of 'Personal Emoluments' and 'Other Charges' and (b) A surplus of \$850,505 from Oil Royalties over expenditure on account of 'Special Expenditure' and 'Public Works Extraordinary'. These facts are made clear in the attached statement. This is in conformity with the established policy in regard to Oil Royalties.

In considering the amount, if any, that should be paid to Reserve Funds from the surplus, the following factors should be taken into account:-

(a) Unknown probable expenditure

- (i) Arrears of pay in respect of Japanese Occupation.
- (ii) War Damage Claims.
- (iii) Increase in High Cost of Living Allowance.
- (iv) Contribution to Expert Commissions and Secretaries salaries.
- (v) Revisions of pay and increase in Establishments.

In view of the probable large amount that may be represented by these factors I do not recommend that any payment be made to the Reserve Fund at the moment.

It is estimated that the surplus of Assets over Liabilities at the beginning of 1947 is \$833,324 (as shown in the relative Statements).

The position of the State therefore is sound and the prospects are good but any large unknown expenditure will have to be met from Oil Royalties as represented by the estimated surplus.

It is obvious of course that the whole of the financial position of the State is dependent on the British Malayan Petroleum Company fulfilling the production programme as indicated to Government.

REVENUE

Duties, Taxes and Licences A conservative estimate is made here-under in keeping with the second half of 1946. Until shipping and materials are in greater supply there is little hope of more than a gradual increase. A large proportion of the import duty is occasioned by constructional materials imported by the British Malayan Petroleum Company.

GOVERNMENT UNDERTAKINGS

Posts and Telegraphs A very considerable increase is to be seen in the figure of \$217,000 which is mainly due to the new issue of Brunei Stamps. Sales to dealers alone via the Crown Agents account for \$150,000.

REVENUE FROM GOVERNMENT PROPERTY

Land Revenue and Oil Royalties \$2,059,900 is the amount shown of which \$2,000,000 is in respect of Oil Royalties. The very extensive programme and new borings by the Oil Company make this target possible.

Interest Interest on bank balances and investments will be maintained at much the same level as pre-war i.e. \$80,500.

EXPENDITURE

H. H. The Sultan There is an increase over pre-war days under this head of about \$17,000 accounted for chiefly by a general upgrading of his Personal Emoluments.

Ministers An additional \$6,000 is shown here in respect of the appointment of Pengiran Bendahara.

Agriculture The Wet Padi Settlement scheme will absorb \$24,500 and Drainage and Irrigation a further \$10,000. Both are vitally necessary.

Education \$10,000 is estimated as a State share of the maintenance of a combined School at Seria and a somewhat similar expenditure will be required for school books etc. This is a Department which is in the course of being overhauled and in view of its great importance to the future of the youth of Brunei there is no doubt that a considerable further demand will be made against the Revenue when Mr. Frisby's scheme is ripe.

Land Special Expenditure of \$148,450 is mainly covered by the Acquisition of Land for roads and a new hospital site.

Medical and Health Other Charges Annually Recurrent are double the amount they were in 1941 but this is due as in Special Expenditure to the previous hospital having been entirely destroyed.

Miscellaneous Services The Cost of Living Allowance accounts for \$150,000 under this head which represents approximately 90%

Public Works Annually Recurrent Increased wages and the high cost of materials are the main reasons for the increase under this head.

Public Works Extraordinary This figure of \$642,800 is the largest item in the Estimates and is justified by the rehabilitation necessary after the tremendous destruction and neglect of maintenance which ensued during the War. The high cost of wages and materials are contributing factors.

Sd. D. Trumble
State Treasurer,
Brunei.

TELEGRAPHIC ADDRESS:
"GOVERN SINGAPORE"

Governor General's Office,
CATHAY BUILDING (9TH FLOOR),

Ref: (2) in G.G. 100/47. *Singapore*, 9th June, 1947.

The Secretary-General presents his
compliments to the Under Secretary of State
for the Colonies and, with reference to para-
graph 3 of the Governor-General's Secret

59701/47. Despatch No. 1 dated the 30th January, 1947, (11) ~ 59701/47
----- has the honour to forward three copies of the
Brunei Financial Statements for the First
quarter, 1947, together with three copies of
----- a Memorandum by the Treasurer, Brunei.

The Under Secretary of State for the Colonies.

COLONIAL OFFICE.

The British Resident,
Brunei.

With reference to the State's financial position and prospects, I enclose herewith the following statements for the first quarter of 1947:-

- (a) Surplus and Deficit Account
- (b) Assets and Liabilities
- (c) Account of Cash receipts and payments.

2. In reviewing the State's Revenue for this period it will be observed that the sum actually credited is \$286,854. This figure however is by no means representative of the revenue earned. Import duties on account of the British Malayan Petroleum Co. amounting to \$220,000 will be credited in the second Quarter. Oil Royalties amounting to \$233,183 covering the period 1st Sept 1946 - 28th Feb. 1947 were credited in April to this Government's account with the Crown Agents in London.

3. A windfall in the nature of a new issue of Brunei stamps accounts for the considerable increase in revenue from Posts & Telegraphs.

4. On 15 Jan. 1947 the Hongkong & Shanghai Bank opened a branch in Brunei Town and in April a further branch opened in Kuala Belait in proximity to the British Malayan Petroleum Co. This State immediately opened accounts with both branches and paid in all available cash. The effect of this action is of course reflected in the accounts. Cash in transit rises to \$510,000. Advances drop to \$11,000 as the Oil Co. is no longer supplied with cash by Government.

5. Expenditure by P.W.D. has not yet got into its stride as the completion of works will naturally draw nearer as the year progresses.

6. Expenditure under the head of Suspense has been low because settlement for supplies has been made only in small part for this period.

7. Supplementary Warrants amounting to \$115,000 have been issued during the first Quarter. It must be pointed out however that \$80,000 from this sum is in respect of an indent on the Crown Agents which cannot be fulfilled this year but in order to ensure delivery one must indent far ahead and it is assumed that provision must be made before indents may be despatched.

8. At the time of writing further Supplementary Warrants have been applied for amounting to some \$270,000 the large majority of which is in respect of High Cost of Living Allowances.

9. It is anticipated that even more money may be required for expenditure on Public Works etc. in view of the capricious prices ruling in this State and the general lack of data on which to base sound estimates of the cost of materials throughout the World.

10. I think my former recommendation that nothing should be credited to Reserve this year will prove wise and that the State will survive these unpredictable demands on its revenue with a surplus but not a very big one.

Sd. D.H.Trumble.
State Treasurer,
Brunei.

Brunei, 21 May, 1947.

Ref: No.(4) in B.T. 15/1947.

The British Resident,
Brunei.

With reference to the State's financial position and prospects, I enclose herewith the following statements for the second Quarter of 1947:

- (a) Surplus and Deficit Account.
- (b) Assets and Liabilities.
- (c) Account of Cash Receipts and Payments.

2. Revenue. The two main items paid into revenue were both received from the British Malayan Petroleum Co. and were in respect of Customs duties (\$200,000) and Oil Royalties (\$233,000). This latter figure is disappointing as it was estimated that production would be larger in the first Quarter than it has been. This payment represents the royalties payable for the half-year ending 28 February 1947 and therefore includes the lower production months of 1946. Production has stepped up considerably during this Quarter and should continue to do so. It follows therefore that higher revenue producing months will be at the end of this year but payment therefore will not be received until 1948. The next and last payment for this year will be made in September. The Oil Royalty actually received may therefore prove to be considerably less than shown in this year's Estimates in spite of increased production. This will be accentuated by the fact that the new arrangement by which Royalty will be paid in kind did not come into effect until 12 August. This arrangement almost doubles the rate of royalty but has become effective later than expected and will be reflected for only six weeks of the revenue received this year i.e. up to 30 September.

3. Revenue in general has exceeded expectations but this excess will probably be off-set by the recent legislation which exempts from import duty machinery and plant imported as replacements for similar materials destroyed or damaged during the war.

4. Expenditure. There is nothing of exceptional interest under this head. The main item is \$118,000 on account of P.W.Dept. This represents part of the erection programme. In general expenditure is going according to plan but it is not yet certain that materials will arrive in time to complete all the Public Works for which Estimates were made.

5. There has been a large payment "below the line" amounting to some \$308,000 in respect of the repayment of cash taken over from the B.M.A.

6. The prospects are sound. I am still of the opinion that after taking into consideration all the factors the State's budget will balance at the close of the year.

Sd. D. Trumble
Treasurer, Brunei.

106

With reference to the State's financial position and prospects, I enclose herewith the following statements for the first quarter of 1947:-

- (a) Surplus and Deficit Account
- (b) Assets and Liabilities
- (c) Account of Cash receipts and payments.

2. In reviewing the State's Revenue for this period it will be observed that the sum actually credited is \$286,854. This figure however is by no means representative of the revenue earned. Import duties on account of the British Malayan Petroleum Co. amounting to \$220,000 will be credited in the second quarter. Oil Royalties amounting to \$233,183 covering the period 1st Sept 1946 - 28th Feb. 1947 were credited in April to this Government's account with the Crown Agents in London.

3. A windfall in the nature of a new issue of Brunei stamps accounts for the considerable increase in revenue from Posts & Telegraphs.

4. On 15 Jan. 1947 the Hongkong & Shanghai Bank opened a branch in Brunei Town and in April a further branch opened in Kuala Belait in proximity to the British Malayan Petroleum Co. This State immediately opened accounts with both branches and paid in all available cash. The effect of this action is of course reflected in the accounts. Cash in transit rises to \$510,000. Advances drop to \$11,000 as the Oil Co. is no longer supplied with cash by Government.

5. Expenditure by P.W.D. has not yet got into its stride as the completion of works will naturally draw nearer as the year progresses

6. Expenditure under the head of Suspense has been low because settlement for supplies has been made only in small part for this period.

7. Supplementary Warrants amounting to \$115,000 have been issued during the first quarter. It must be pointed out however that \$80,000 from this sum is in respect of an indent on the Crown Agents which cannot be fulfilled this year but in order to ensure delivery one must indent far ahead and it is assumed that provision must be made before indents may be despatched.

8. At the time of writing further Supplementary Warrants have been applied for amounting to some \$270,000 the large majority of which is in respect of High Cost of Living Allowances.

9. It is anticipated that even more money may be required for expenditure on Public Works etc. in view of the capricious prices ruling in this State and the general lack of data on which to base sound estimates of the cost of materials throughout the World.

10. I think my former recommendation that nothing should be credited to Reserve this year will prove wise and that the State will survive these unpredictable demands on its revenue with a surplus but not a very big one.

Sd. D.H. Trumble.
State Treasurer,
Brunei.

Brunei, 21 May, 1947.

The British Resident,
Brunei.

With reference to the State's financial position and prospects, I enclose herewith the following statements for the fourth quarter of 1947

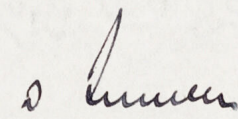

- (A) Surplus and Deficit Account.
- (B) Assets and Liabilities.
- (C) Account of Cash Receipts and Payments.

2. Revenue. Customs Revenue is exceptionally high this Quarter. This is partly due to the response by the British Malayan Petroleum Co. to pay all duties outstanding before the close of the year and partly due to the arrival of a very large amount of dutiable equipment.

An unestimated item of \$419,000 was received from the Malayan Currency Board in respect of currency profits. Oil Royalties amounted to \$761,000

3. Expenditure. Expenditure on behalf of Medical Services - Public Works was considerably less than anticipated owing to the non-arrival of materials.

4. Prospects remain sound.

S. D. Trumble
(Sgd) D. TRUMBLE
TREASURER
BRUNEI

The British Resident,
Brunei.

With reference to the State's financial position and prospects, I enclose herewith the following statements for the third Quarter of 1947:

- (a) Surplus and Deficit Account.
- (b) Assets and Liabilities.
- (c) Account of Cash Receipts and Payments.

2. Revenue. Customs Revenue is unexpectedly higher this quarter than last. The increase of \$250,000 is due to large imports by the British Malayan Petroleum Coy. in connection with its oilfield development project.

3. Expenditure. Expenditure has been normal with the exception of that under P.W.D. which is lower than expected owing to non-arrival of goods.

4. Oil royalties accruing during this period amounted to \$761,000 and will be shown in the last Quarter's Return.

5. Prospects remain sound.

Brunei Treasury,
Brunei, 12th Nov., 1947.

D. Sumner
TREASURER.
